

Gene Search Guide

Follow these simple steps to find your favorite clones from GeneCopoeia.

- 1. Go to "Search products/clones" webpage.
- 2. Choose any of three options provided to start the search
 - Use "Simple Search." Type any keyword.
 (Description, Nucleotide accession, Entrez gene ID, Symbols/Aliases or Catalog/product ID)
 - · Search by a particular field
 - · Search by BLAST
- 3. The search engine gives options based on the search query entered. Click on the column "Product ID."
- 4. The webpage with all the information available for that gene with the chosen product ID comes up.
 - Choose among 80 different ready-for-expression vector types including mammalian, bacterial, lentiviral, insect and yeast.
 - Gateway shuttle system and ORFeome Collaboration clones are also available.
 - Related products used with the clone of interest is also listed for quick access.
- 5. To learn more about the specific gene or to view the gene annotation page, click on "Product ID" again.
- 6. To view price and proceed with the order, select the appropriate expression vector type.
